Education

• University Of Mumbai

August 2020 – May 2024

Grade: 9.28 CGPA

Major: Computer Engineering, Bachelor of Engineering (BE)

Coursework: Data Structures and Algorithms, Social Media Analytics, Computer Networks, Mobile Computing

Academic Achievements: Secured top 10 rank in Academics in TE and BE across all departments.

Extra Curricular: Event Head at Technical Event (Vectors) for **Game of Codes**

Experience

Flutter Application Developer, Finoux Solutions, Mumbai

June 2024 – Present

- Developed FinTech applications with cross-functional teams (backend developers, designers, and QA) in an Agile environment, ensuring seamless trading and financial operations.
- Built scalable, reusable UI components and integrated REST APIs & WebSockets for real-time financial data and live trading updates.
- Managed Android & iOS builds, including certificates, provisioning, and TestFlight releases, optimizing deployment workflows.
- worked to ensure performance optimizations, reducing load times and enhancing app efficiency, while using Git/GitLab for version control and Postman for API testing & debugging.

Key Achievements and Projects

Bullforce Trading App

- Developed key modules like User Onboarding, Buy/Sell, Watchlist and Calculators, ensuring a smooth UX with dynamic form handling, API integrations, and validation checks.
- Designed and implemented a responsive UI with theme management to maintain consistency across multiple devices using adaptive layouts, custom typography, and reusable UI components.
- Used Cubit for state management ensuring seamless navigation and GitLab/GitHub for version control.
- Implemented and worked with key Flutter packages, including Geolocator, Flutter Email Launcher, and Dio.

Bondbazaar

[Link](#)

- Developed and integrated a 10-step KYC onboarding flow for a bond investment platform, including OTP/email verification, bank verification, Aadhar ESign ensuring compliance with SEBI and RBI regulations.
- Built UI and validation logic for displaying secure bond instruments like G-Secs, SGBs, and corporate bonds, including dynamic fields such as yield, coupon % and maturity date.
- Added support for live RFQ (Request for Quote) trading, enabling real-time buy/sell flows with fields like issue price, min investment, redemption date, and realized returns for retail bond investors.
- Designed and implemented the portfolio module showing user holdings, realized returns and upcoming redemption dates, enhancing investor transparency and fixed-income investments.

SBFC Saahayak

- Developing SBFC Saahayak, a Flutter-based app for sales agents to manage and track loan leads with live photo capture and location tagging.
- Integrated role-based logins and user hierarchy, enabling managers to monitor subordinate performance and lead data.
- Implemented a multi-step eKYC module including Aadhaar, PAN, CIBIL check, and co-applicant validation for loan eligibility.
- Added Power BI dashboards for business users to visualize key performance and loan metrics.

Technologies

Languages: Dart, Python, HTML5/CSS3, SQL, JavaScript

Frameworks & Libraries: Flutter, Cubit, Bloc, GetX, Firebase, Dio, Geolocator.

Tools & Technologies: Android Studio, Xcode, Git/GitLab, Azure DevOps, Postman, Figma, Mantis

Soft Skills: Problem-Solving, Critical Thinking, Adaptability, Time Management

Certifications

- 1) Certificate of **100 days of Code** Python from Udemy
- 2) Certificate of **Ethical Hacking from Scratch**
- 3) Certificate of **Flutter & Dart - The Complete Guide**
